1. Claims 1-34 are again rejected under 35 U.S.C. 103(a) as being unpatentable over applicants' admissions.

The parameter of image density is an art recognized desirable property. Stick-preventative agents are known for their ability to give sharper (i.e. denser) images. Consequently, testing known stick agents to determine which ones give denser images constitutes optimization of the prior art. The Foster Declaration constitutes a summary of optimization rather than a showing of unexpected results.

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
